DAS 1.0 Release Notes

This document provides you with the latest information about the Data Analytics Studio 1.0 release and its product documentation.

What's New in this Release

New features and changes for DAS 1.0 have been introduced in the Hortonworks DataPlane Platform, along with documentation updates. New features are described in the following sections.

- DAS 1.0
  - General Availability (GA) of DAS
  - Ability to search queries
  - Ability to compose and execute queries
  - Ability to manage databases
  - Ability to create and monitor reports

Unsupported Features

This section lists features that are not officially supported by DAS 1.0 in a production environment.

- Support for two-way wire encrypted clusters

Technical Preview Features

The following features are available within DAS 1.0 but are not ready for production deployment. Hortonworks encourages you to explore these technical preview features in non-production environments and provide feedback on your experiences through the Hortonworks Community Connection (HCC).

- Read and write reports
- Join reports

Known Issues

Data Analytics Studio 1.0 has the following known issues, scheduled for resolution in a future release. Where available, a workaround has been provided.

Table 1: DSS Known Issues

Hortonworks Bug ID	Summary
RMP-1625	Problem: Erasure coding is not enabled on DAS logs folder.
BUG-94611	Problem: Visual Explain for the same query shows different graphs on Compose page and Query Details page.
BUG-100709	Problem: Worksheet page does not show partitioned columns of a table. Description: In the worksheet page, the table columns do not include partitioned columns and autocomplete does not suggest partitioned columns.
BUG-101304	Problem: On restarting HSI, the query execution is stopped, but the query status in DAS does not change. Description: While running some queries, if you restart HSI, the query execution is stopped. However, DAS does not reflect this change and the queries appear to be in the same state forever.

Hortonworks Bug ID	Summary
BUG-102800	Problem: After a fresh installation, when there is no data and you try to access Reports tab, it throws HTTP 404 Not Found Error.
BUG-106425	Problem: When you try to load a database with more than 3000 tables, the Compose page crashes.
BUG-106428	Problem: When you try to load a database with more than 3000 tables, the Read Reports page crashes.
BUG-107951	Problem: Join count does not get updated for tables with partitioned columns.
